

OVERVIEW

Brown Capital Management strives to build investment programs that meet the needs of genuine long-term investors. Investment team members execute a time-tested process that seeks to position them as patient business owners, rather than short-term traders. They invest with the courage of their convictions, no matter the market environment.

A METHODOICAL APPROACH TO INVESTING IN EXCEPTIONAL MID COMPANIES

The investment team seeks to identify and invest in exceptional companies that save time, lives, money or headaches, or provide compelling value proposition to consumers. The portfolio is comprised of 40-60 of these exceptional mid sized growth companies that have the potential to grow revenues and earnings significantly over a three-to-five-year evaluation horizon and beyond.

BENCHMARK AGNOSTIC

Experience taught Brown Capital Management that managing to a benchmark can be a distraction and a threat to long-term results. Therefore, the portfolio's holdings and performance may vary significantly from common indexes over time. As a result, the firm's low turnover approach may be best suited to investors who maintain a long-term investment horizon.

RISK MANAGEMENT

Managing risk occurs through portfolio diversification and, most important, an in-depth awareness of risk at a company level.

* Since inception performance is based on Composite Creation Date. Gross numbers are furnished upon request.

For the purpose of performance presentation, the composite had an uninterrupted performance track record from December 31, 1992 to November 30, 2016, a "performance gap" from November 30, 2106 to December 31, 2016, and an uninterrupted performance track record from December 31, 2016 to June 30, 2017.

Note: Performance results are net of executive costs and reflect the reinvestment of interest, capital gains, and dividends net of any withholding tax. Net of fees performance through 12/31/14 is calculated using the highest management fee and reflects the deduction of performance based fees when applicable. Beginning January 2015, actual fees have been used to calculate net of fee performance. Fees paid vary by client.

Please refer to the attached Performance Presentation and Disclosures. It contains additional required disclosures and important information regarding calculation of performance data, including the general effect of fees on returns. Past performance is not a guarantee of future results.

The Large/Mid Team has over 100 years of cumulative investment experience, with more than half of that time spent at Brown Capital Management. Each team member is both an analyst and a portfolio manager. As analysts, they are each charged with conducting rigorous fundamental analysis, scrutinizing every facet of a potential investment in order to uncover the large and mid sized companies the firm believes has exceptional long-term growth potential. As portfolio managers, their goal is to build a benchmark-agnostic, diversified portfolio that grows client capital over the long-term. As a team, they have navigated the Large Cap and Mid Company Strategies, and the Mid Company Fund through multiple market cycles.

¹Net of fees performance is calculated using actual management fees. The net return is reflective of actual fees and fees paid vary by client.

Disclosure Requirements

Mid Company Service AS OF SEPTEMBER 30, 2017

Compliance Statement

Brown Capital Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Capital Management has been independently verified for the periods January 1, 1993 through June 30, 2017.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Mid Company Composite (formerly Tax-Exempt Mid Company Composite) has been examined for the periods January 1, 1993 through September 30, 2016 and restricted from December 31, 2016 through June 30, 2017. The verification and performance examination reports are available upon request.

The Firm

BCM is defined as an independent investment management firm established in 1983 that is not affiliated with any parent organization and is registered under the Investment Advisers Act of 1940. BCM manages a variety of equity and balanced accounts for domestic and international institutional clients. The firm's list of composite descriptions, as well as information regarding the firm's policies for valuing portfolios, calculating performance, and preparing compliant presentations, are available upon request.

Composite

The Mid Company Composite (formerly Tax-Exempt Mid Company Composite) -- The performance record of the composite which came to an end on November 30, 2016, represented the performance for fee-paying accounts of tax-exempt investors including those no longer under management where BCM has sole investment authority. The Mid Company Composite performance track record from December 31, 2016, includes both tax-exempt and taxable separately managed accounts where BCM has sole investment authority. The composite seeks long-term capital appreciation through investing in equity securities. The dominant portion of the portfolio is distinctly mid cap securities with market values less than \$20 billion. There has been no selectivity of account results for any period. No alterations of the composite have occurred because of changes in personnel, or for other reasons at any time. Data for all accounts has been continuous from each account's first full quarter of management through the last full month of management prior to cessation of the account. Investors should be cognizant of the fact that while, there is the potential of gains, there is also the potential of losses. Composite creation date is January 1, 1993, and reflects activity of current managers.

Benchmark

The composite is measured against the Russell Mid Cap Growth Index. The Russell Mid Cap Growth Index offers investors access to the mid cap growth segment of the U.S. equity universe. The Russell Midcap Growth Index is constructed to provide a comprehensive and unbiased barometer of the mid cap growth market. Based on ongoing empirical research of investment manager behavior, the methodology used to determine growth probability approximates the aggregate mid cap growth manager's opportunity set.

Disclosure Requirements

Mid Company Service AS OF SEPTEMBER 30, 2017

Methodology

The composite is reported in U.S. dollars. BCM has adopted a Valuation of Securities policy which requires that all client portfolios and investments reflect current, fair, and accurate market valuations. For month end pricing, BCM's policy is to use 4:00 p.m. prices for equity securities, where such is available. BCM utilizes, to the fullest extent possible, recognized and independent pricing services and/or qualified custodians for timely valuation information for advisory client securities. Whenever valuation information for specific, illiquid, foreign, private or other investments is not available through pricing services, the Director of Portfolio and Mutual Fund Administration will work with the trader(s) and Portfolio Manager(s) to obtain and document price information from two independent sources if available, whether it be a broker-dealer, bank, pricing service, or other source. Any errors in pricing or valuations are to be resolved as promptly as possible, preferably upon a same day or next day basis, with re-pricing information obtained, reviewed, and approved by the CCO/Director of Portfolio and Mutual Fund Administration. Securities without market valuation information (e.g., illiquid securities, or other such situations) are to be reviewed and priced by the Director of Portfolio and Mutual Fund Administration, in conjunction with an appropriate Portfolio Manager and trader in good faith to reflect the security's fair and current market value. Through regular monthly reconciliation with custodian banks, any significant irregularities in prices will be detected and corrected before market values are finalized and performance calculation is done.

Fees

Investment advisory fees are:
0.55% of first \$100 million of assets
0.45% of assets over \$100 million

Performance results are net of execution costs and reflect the reinvestment of interest, capital gains, and dividends net of any withholding tax. Net of fees performance through 12/31/14 is calculated using the highest management fee and reflects the deduction of performance based fees when applicable. Beginning January 2015, actual fees have been used to calculate net of performance. The net return is reflective of actual fees and fees paid vary by client.

Internal Dispersion

Internal dispersion is calculated using the equal weighted standard deviation of annual gross-of-fees returns of those portfolios that were included in the composite for the entire year. For those years when less than five portfolios were included in the composite for the full year, no dispersion measure is presented.

Ex-Post Standard Deviation

The 3-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period.
